**Subject:** Re: Update to Workplan  
12 Month Action Plan 1-12-2010 with SWB adds.doc

Sue, I told you I would send you today our actions for this year to include in the state federal workplan. The underline version is attached.

I am also sending this to USEPA because I see that its actions are not included in your version. This still needs some work. I would like to see the USEPA/State Water Board actions appear as a coordinated section.

I will contact USEPA next week to try to make that happen, and I will get back to you. Thanks

Tom,

After talking with David Nawi and Lester, we have refined the workplan to focus on the 12 month actions requiring state-federal cooperation/collaboration. I'm attaching that revised draft for your review. I know we will want to add information on the fish flows in this and some water quality actions? Looking forward to your input.

Sue
